

Specifications

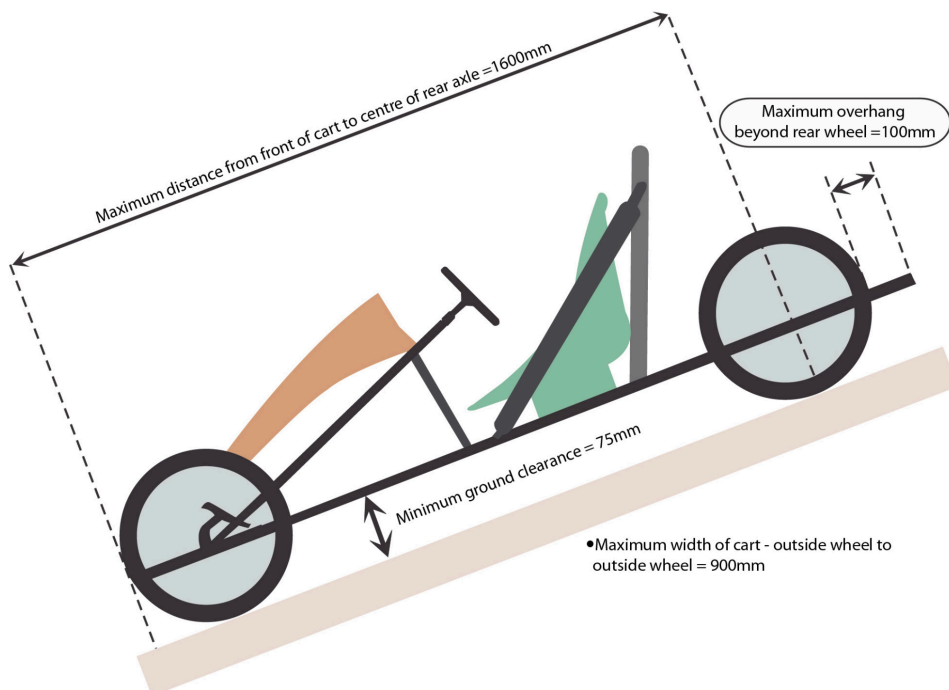

Brisbane Billycart Championships

\$10.00 Entry fee per driver – proceeds assist in staging the event

The races are held on a grass hill with a three level Starting Ramp. The ramp is designed to suit most carts so it is important that the following sizes be used when building your billycart. All carts will undergo a safety check and scrutiny after registration on Sunday morning, before being eligible to race. 4 and 5 year old drivers will start from the grass slope at the base of the ramps.

ALL Billycarts and Drivers must comply with the following specifications for your cart

1. All drivers MUST wear a good condition helmet (bicycle/motorcycle) with a secured chin strap and closed in footwear
2. Four wheel carts only – NO three wheel designs
3. Seating must be firmly secured to the cart
4. Steering wheel must be securely fixed to the steering column so as not to cause injury to the driver in the event of an accident
5. Traditional Billycarts have simple rope to front axle steering. Feet must be on front axle or on foot pegs/rests
6. Modified Billycarts to have 4 wheels with diameters greater than 300mm
7. Maximum distance – front of cart to the centre of the rear axle = 1600mm
8. Maximum width of cart – outside wheel to outside wheel = 900mm
9. Maximum overhang beyond rear wheel = 100mm
10. Minimum wheel diameter for Traditional Billycarts to be 150mm
11. Minimum ground clearance – 75mm

Please follow dimensions carefully. Incorrectly sized carts may not fit the ramps and may NOT be allowed to race.
